D69	8360130	1160	38	red	S	A2A2

**Color:** Bb = blk red carrier, BB = homo-blk, RB = red baldy, Hfd = Hereford

**H/P/S:** Horned, Polled, or Scurred

**A2:** beta-casin found in milk (see the link on our Sires page for more info)

Each bull passed a rigorous breeding soundness exam and semen test in the Spring of 2017, and are guaranteed breeders. Scrotal measurements and weights were taken in late November 2017. There are no, "well, he should be ok" bulls. We measure scrotal size with a tight tape. There are no fat deposits in these scrotals to inflate the measurements. The bulls are fleshy and in breeding shape, not slaughter steer shape.

We have never had a positive Trich test, but we know many areas require bulls to be tested. For your convenience, we test them for you. If you have any questions about the breeding soundness of these bulls, feel free to contact Dr. Jim Briddle, DVM at (307) 856-0550. He will be happy to talk with you.
